

A results-oriented oral radiology service now serving Oakville

Our goal at Canaray is to deliver results that are useful, with a continuous emphasis on improving turnaround times, friendly service and competitive pricing. Give us a try and see how we do!

Quality-Controlled Imaging and Reporting

We perform and interpret 3D diagnostic imaging at our facility at the 165 Cross Avenue, Suite 200, Oakville. Images produced by us receive an expedited workup that is customized to your specifications.

Quick Turnaround Times. Guaranteed.

We do not miss deadlines. If you need a case quickly, let us know. Canaray Oakville can see patients on short notice, and Canaray will have your reports ready when you need it.

Visually Oriented Radiographic Reports

We have made a name for ourselves by pushing the envelope for radiographic reporting, and will give you the answers you want in a format that facilitates patient education. See it. Show it. Do it.

Access Your Cases From Anywhere. Anytime.

We store and serve all your case data on secure servers indefinitely, so that access to them is as convenient as the nearest internet-enabled computer, phone or tablet.

Email and Internet Delivery to Complement Mail

For instant results, nothing beats email or online delivery. See the results for every case immediately, while waiting for the hard copy to arrive via mail.

Full range of CBCT scanning capabilities

Our scanner is suitable for high-resolution small scans for applications like endodontics, as well as for general dental imaging.

Fully Segmented Implant Conversions and Cleanup

Instead of cutting corners on segmentations, we segment out every tooth individually. All at very competitive prices.

Sensible Measurements From A Planning Perspective

If you're used to measurements on cross-sectional images, we'll do them the way you like them. We measure everything, and we don't skimp on slices.

High Quality Image Presentation And Packaging

Let's face it: Looks matter. The scans you order from Canaray Oakville will be formatted into an attractive document for treatment planning presentations.

We're continually asking ourselves whether the results we're producing are as useful as they can be. The products that we're shipping today are the culmination of continuous feedback, criticism, and suggestions from clinicians. We're here to do what you want us to do, and our goal is never to be simply our best, but to be the best.

That's the Canaray way of doing things
